MOTHER AND DAUGHTER BANQUET PROVES WONDERFUL SUCCESS

C. G. I. T., B'ue and Gold Colours. Predominate in Decorating Hall

On Tuesday evening, May 28, the local C.G.I.T. group entertained their mothers at a banquet in the F.A. Hall. Blue and gold, the colors of the club, predominated in the decorating scheme of the room, and the daintily laid tables held vases of red and white carnations. The president, Mabel Young, was toastmistress.

A programme, creditable to the committee in charge, was composed of the following: A toast to the King and Country, proposed by Frances Mabbs, in which she expressed the thankfulness of the people at the recovery of our Monarch from his recent illness, responded to by a verse of O Canada, sung by everyone; a toast to the Church, by Frances McFadyen, answered in a wholehearted manner by Mrs. Waldo. Marjorie Metheral ensured an attentive audience with a clever pianoforte solo. Mrs. Laut gave an extremely interesting talk on the names and meanings of various Alberta towns, which are familiar to all of us. Ida Calhoun proposed a toast to our Mothers, which was suitably responded to by Mrs. Calhoun in a short poem by Guest, entitled "Our Daughters."

Florence Cruickshank, one of the youngest members of the group, delighted everyone with a dainty dance. Mrs. MacKay proposed a toast to Our Daughters, with a few fitting lines from Longfellow, and Margaret MacKay answered with a witty verse complimenting "Our Ma's." Frances Mabbs was enthusiastically received when she gave a short reading, which

fitted in singularly with the thread of the chief speaker's address. Mabel Gordon, then proposed a toast to the whole C.G.I.T. organization and Miss Nix, the retiring secretary of the Girls Work Board for Alberta, was introduced and responded with an interesting talk.

Miss Nix gave a short outline of the work accomplished at the recent staff conference held in Toronto. She also referred to the results being obtained in the C.G.I.T. work in all parts of Canada, especially in outlying districts where advantages are few, and the initial work of public speaking or leading is learned. Our special motive she urged the girls to bring foremost is the C.G.I.T. purpose, by explaining and stressing the meaning of Canadian Girls in Training and the important part they are playing in a nation-wide organization.

She also spoke warmly of camp, which is provided during the summer months, and drew a thrilling word picture of the various activities entered into, the beautiful inspirations invited in one's mind and the healthy outdoor life, all of which may be vouchered for by any members who have attended camps in the past few years. After Miss Nix had concluded her encouraging address, Ida Calhoun favored the gathering with a vocal solo, entitled "Little Mother of Mine." Then a hilarious acting of "Lord Ullin's Daughter" by the Senior Girls was followed by a short sing-song and the happy evening was brought to a close.

CROSSFIELD HOLDS LEADERSHIP IN THE ROSEBUD LEAGUE

Red Deer Beaten 7-6 — Innisfail Fails to Score When Guertin and His Team Mates Administrate A Shut Out 8-0

Red Deer Desperately Tried For A Win, But their Efforts Failed

The Crossfield baseball team held the leadership in the Rosebud League by defeating Red Deer on Monday evening, by a score of 7 to 6, at Red Deer, in a closely contested game. We must admit that it was a hard game to win, as the umpire gave all the breaks of the game against the visitors. Captain Williams kept his team working like a clock and they out generalised Red Deer in the pinches. Crossfield took the lead in the first inning and were never headed. In the third inning E. Bills connected with Blade's offering for a home run.

Owing to the night being cold, the Crossfield captain relayed his hurling staff on the mound, giving the Red Deer batters plenty of variety.

About ten carloads of fans accompanied the team to Red Deer in order to root for the team.

This made four straight wins for Crossfield in the Rosebud League.

On Friday, May 24th, the locals played a double header with the Calgary Allys baseball team. Crossfield won both games; the first 7 to 0, and the second game 7 to 2.

Carstairs plays at Crossfield on Monday, June 3rd, at 6:15.

INNISFAIL SHUT OUT WHEN CROSSFIELD CHALKS UP THEIR FIFTH VICTORY

On Wednesday evening the Crossfield baseball team chalked up the fifth straight victory in the Rosebud League, when they shut-out the Innisfail team by a score of 8 to 0, before the largest crowd of spectators that have ever been present at a game here for many years.

Innisfail arrived confident of a win, but after nine innings, in which Lefty Guertin held them scoreless, they left satisfied that his curves had them baffled. Innisfail failed to even get a runner past second base.

Thompson, hurling for Innisfail, pitched a good game, but received poor support from his team-mates. Sensational fielding was done by Johnson, McCook, and C. Guertin.

Crossfield lineup: E. Guertin, p; Williams, c; K. Borbridge, 1b; Smith, 2b; Johnson, 3b; McDowell, ss; C. Guertin, lf; A. Ross, inson, cf; R. M. McCool, rf.

Ralph Johnson, a member of the local baseball team was the first player to make a home run on the diamond here and consequently wins the \$5.00 offered by the club for that honor. Mr. Cruickshanks and E. Bills were the donors. Who's next to make a similar offer?

Hon. Perrin Baker Will Address Public Meeting Pure Bred Herefords

A meeting of supreme importance to everyone will be addressed by Hon. Perrin Baker, Minister of Education, Monday, June 3, in the U.F.A. Hall. The motive of the gathering is to discuss the new school question, and a large attendance is desired, so that noticeable results may be obtained.

WOMEN'S GUILD TO MEET

The regular monthly meeting of the Women's Guild will be held on Thursday, June 6th, at the home of Mrs. Hewitt, who has moved into Mrs. B. Whitfield's house. Will all members attend at 8:30 as promptly as possible!

FLORAL U.F.W.A. TO MEET

The regular meeting of the Floral U.F.W.A. will be held at the home of Mrs. Jas. Cavender on Thursday, June 13th, at 2:30 p.m. Mrs. Price, second vice-president and convener of immigration of the U.F.W.A. will address the meeting. All visitors will be very welcome.

Great Soldier's Warning Against War

One of the gravest errors some pacifists make, says Toronto Saturday Night, is to suppose that all soldiers of military ability favor war. This is far from being true and the fact is illustrated by the great British general, Field Marshal Sir William Robertson, who has on many occasions raised his voice against war as an institution for the settlement of international disputes.

Quite recently he has spoken again, pointing out that the desire to avoid another war is common to most countries. It would be strange if it were not so, he says, inasmuch as the last war cost the world ten million lives or double the number lost in all wars of the preceding 120 years put together. It also cost not less than \$350,000,000,000, a sum that the human mind is hardly competent to conceive, to say nothing of an incalculable total of distress, sorrow and injury. Its failure as a solution of international dispute is demonstrable from the fact that it left behind grievances and resentments that can not be eradicated within the lifetime of most adults now living.

Yet though war is condemned by the intelligent men of all the nations who twenty years ago thought of it lightly as an inevitable future development, not devoid of possible advantages, preparations go on as if they did prior to 1914. Sir William Robertson is genuinely alarmed over the tendency to increasing competition in armaments. All the great powers, with (we are glad to note), the exception of Great Britain, are today spending more money on armed forces than they spent five years ago. Even with a reduced scale of expenditure Great Britain is practically compelled to spend \$1,575,000,000, irrespective of the contributions of India and other parts of the Empire, from the sheer necessity of fulfilling her military responsibilities in various parts of the world and protecting sea communications. France and Italy today have approximately as many men under arms as in 1914. Germany is complaining of her defenceless position, and if armaments are piled up by her neighbors, must some day be given permission to arm also. Many smaller nations of Europe are on a military footing and maintaining a threatening attitude toward each other. The United States feels that future security demands a vast additional naval expenditure.

What does all this madness portend? Peace is a game which all must play if it is to be maintained. Let us hope that the craze for armament falls of its own weight before the nations get at each other's throats again. The only vestige of a silver lining lies in the fact that machinery for the isolation and prevention of wars now exists, a factor never previously known in the world's history; but it is plain that the miracle which will convert the human mass from madness to sanity cannot be performed with a single gesture.

What Britain Has Done

Has Led the World in Disarmament Says Stanley Baldwin

"Years ago seamen sailed from Plymouth to discover a new world. We are going to rediscover a new moral world, which is a very much harder task," said Premier Stanley Baldwin, speaking at Plymouth, during his campaign tour of western England.

"We have led the way to disarmament," the premier said. "The fleet today is half the size it was in 1913. That is practical disarmament and no nation in the world can come any where near that, yet there are Englishmen who say we are lagging behind."

"My hope is that the new government will be able to conclude an agreement with the United States which will lift the whole problem of disarmament to a new plane of action and not talk."

HOUSEHOLD CARES

Fall Heavily On the Woman Who Is Run Down—Thin Blood the Trouble

To the woman who has her household work to do and her family to attend to, illness is almost a daily trouble. Many a woman keeps on with her household duties when she is feeling ready to drop. Her head aches, she may be breathless at the least exertion she has little relish for food, and always nervous. This is the trouble is poor blood—thin, watery blood, and she badly needs the health pills that Dr. Williams' Pink Pills can give her. The rich, red blood which comes through the use of these pills promptly restores the anemic sufferers to good health. Among the thousands who have found new life through the use of this medicine is Mrs. John W. MacDonald, Cardigan, P.E.I., who says: "I can not strongly recommend Dr. Williams' Pink Pills. I was so run down in health that I was unable to do my household work. My husband thought I would never get better, as I had tried different kinds of medicine with no success whatever. I was advised to try Dr. Williams' Pink Pills, which I did, and to my joy found they were just the thing I needed. I took six boxes of the pills and found myself restored to my old-time good health."

Try Dr. Williams' Pink Pills for anemia, rheumatism, neuralgia, nervousness. Take them as a tonic if you are not in the best physical condition and cultivate resistance that will keep you well and strong. Get a box from the nearest drug store and begin this treatment now; or you can get the pills by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Tea Of Old England

For some reason Great Britain alone among Western nations has popularized the use of tea. It has become the national beverage. The "beer of old England" has given place to the "tea of old England," and in its sentimental associations a "cup of tea" can vie with a "mug of ale." It is not too much to say that the British fought the war on tea.

It Will Relieve a Cold.—Colds are the commonest ailments of mankind, and if neglected may lead to serious conditions. Dr. Thomas' Electric Oil will relieve the bronchial passages of inflammation, soothe thoroughly and will strengthen them against subsequent attack. And it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

Only Two Members Left

Marshal Joffre and Count Togo Wear Order Of Merit

The recent death of Marshal Foch, writes "Looker-On" in the London Daily Chronicle, leaves only one soldier entitled to wear the Order of Merit—his fellow-countryman, Marshal Joffre. The only other foreign member of this Order is the veteran Count Togo of Japan. At present there is no British soldier wearing the Order of Merit. Marshal Foch's death, too, leaves only one foreign Field-Marshal in our Army. This is King Albert, of the Belgians, upon whom his Majesty King George conferred this rank eight years ago.

Miller's Worm Powder.—The medicine for children who are found suffering from the ravages of worms. They immediately alter the stomachic conditions under which the worms subsist and drive them from the system, and, at the same time, they are tonic in their effect upon the digestive organs, restoring them to healthful operation and ensuring immunity from further disorders from such a cause.

Charting Swiss Glaciers

Ninety-two of the Swiss glaciers are being measured to see whether they advance or recede. A thin steel wire is fastened across the snout of the glacier attached to a dial on either side. At present fourteen are advancing and seventy-three receding.

C.N.R. Summer Schedules

Canadian National Announces Changes In the Schedules For Summer Months

"The Confederation," running on the Canadian National Railways between Toronto and Vancouver, by way of Winnipeg, Brandon, Regina, Saskatoon, Edmonton and Jasper, was again in operation on May 19, replacing "The National," which runs between Toronto and Winnipeg.

The first westbound "Confederation" left Toronto on Sunday, May 19, and another set of equipment left Winnipeg on the same day. The westbound train will reach Edmonton daily at 10 a.m., leaving 20 minutes later, arriving at Jasper at 6:20 p.m., Mountain Time, and leaving at 5:40 Pacific Time. Eastbound, the train will reach Jasper at 6:40 a.m., Pacific Time, and leave at 8:05 a.m. Mountain Time, arriving at Edmonton at 3:20 p.m., and leaving at 3:40.

Other time table changes announced by the National system include: Calgary-Edmonton—Train 13, will leave Calgary at 8 a.m. instead of 7:30, effective May 20. It will connect at Camrose with train 25 from Big Valley, Stettler and other points, and at Tofield with the Confederation for points east. Effective May 20, train 25 will leave Calgary at 7 a.m. instead of 7:30, also connecting at Camrose and at Tofield.

Edmonton-Alliance—Will leave at 4:50 p.m. instead of 4:55, effective May 21.

Hanna-Wardlaw—Will leave at 9:45 a.m. instead of 9 a.m., arriving at Wardlaw half an hour earlier, effective May 21. In the opposite direction the train will leave Wardlaw at the usual time but will arrive at Hanna three quarters of an hour earlier.

Hanna-Warden-Mirror—Will leave at 7 a.m. instead of 7:45, effective May 20, arriving at Warden at noon instead of 12:45, and at Mirror at 3:45 instead of 4:15.

Beach trains—will leave Edmonton for Alberta Beach and Lac Ste. Anne at 2 p.m. Saturdays, from June 29 to August 31 inclusive; at 6:30 p.m. Saturdays ("Moonlight") July 6 to August 17 inclusive; at 2 p.m. Wednesdays, July 3 to August 29 inclusive. Campers' specials will leave Edmonton for Vabamun, Falls and Beba Beach, Saturdays at 1:30 p.m., from June 29 to August 31 inclusive.

WHEN a cold or exposure brings aches and pains that penetrate to your very bones, there is always quick relief in Aspirin. It will make short work of that headache or any little pain. Just a few tablets to relieve, and they don't affect the heart. All druggists, with proven directions for various uses which many people have found invaluable in the relief of pains and aches of many kinds.

Aspirin is a Trademark Registered in Canada

Soviets Changing Policy

Will Proceed Along Different Lines Regarding Religious Practices

Removal of constitutional restrictions on religious practices is soon to be proposed to the Soviet congress. A. Bykoff, president of the Council of People's Commissars, told delegates to the congress they would soon be invited to vote on such an amendment to the constitution.

The decrees fighting religion had proved to bring harm as well as benefit, he said. President Bykoff added that congress would be called upon to ratify a constitutional amendment providing for separation of church and state, church and schools, and granting all citizens the right to religious practice as well as anti-religious propaganda.

It appeared from the speech of the president that the Soviet was not to abandon its attempts to discredit religions, but simply to proceed, removing the stimulus of persecution. The constitution set up on the establishment of Soviet socialist republics, forbade the practice of any religion.

Royal Yeast Cakes

Harvest Kelp From Sea Floor

Weed Is Being Tested For Value As

Seaweed is now believed to be an extremely valuable food for cattle and other live stock, and now a Los Angeles inventor comes forward with a machine for gathering it from the bottom of the sea. His machine, which was recently demonstrated in California, is mounted on a scow. An endless belt of spiked crosspieces runs from the surface of the scow to the harbor bottom, where blades tear off the kelp. The weeds catch upon the moving crosspieces and are raised to the scow, where they are piled up like hay to dry.

The kelp is then ground and fed to farm animals with their hay and grain. It may also be used as a fertilizer, and from it can be extracted large quantities of iodine and potash. Tests are now being made to determine its relative value as cattle fodder.

Cuts and Bruises Disappear.—When suffering from cuts, scratches, bruises, sprains, sore throat or chest and any similar ailment, use Dr. Thomas' Electric Oil. Its healing power is well-known in every section of the community. A bottle of Dr. Thomas' Electric Oil should be in every medicine chest, ready for the emergencies that may always be anticipated.

Mail Service For North

Areas In Northern Manitoba To Be Brought Within Closer Touch Of Outside World

Dwellers in the remote areas of northern Manitoba will be brought into closer touch with the "outside" world this summer through arrangements made by the Post Office Department, adding settlements at Oxford, Gods and Island Lake to the growing chain of northern mail points of call. Mail will be delivered once a week with Norway House, at the northern end of Lake Winnipeg, as the distributing centre.

For sunburn—apply Minard's Liniment.

The English language is spoken by 180,000,000 people. German, by 120,000,000, and French by 90,000,000.

Was In Bed All Summer

"I have to work in the store and do my own housework, too, and I get nervous and run-down and was bed nearly all summer. The least noise would make me nervous. I was told to take Lydia E. Pinkham's Vegetable Compound and I have taken seven bottles. It has made me stronger and put more color into my face. I am looking after my store and housework and my four children and I am getting along nicely now."—Mrs. J. Malt, R. R. No. 3, Barton St. East, Hamilton, Ontario, Canada.

Lydia E. Pinkham's Vegetable Compound

New Appointment

The appointment is announced by W. D. Robb, vice-president of the Canadian National Railways, of E. A. Weir, hitherto European publicity agent of the Canadian National system at London, England, to be director of radio for the system, with headquarters at Montreal, succeeding the late A. R. McEwan.

New Trade Commissioner

It is officially announced that a new trade commissioner office of the Department of Trade and Commerce has been opened in Oslo, Norway, with F. H. Palmer as acting trade commissioner, the territory covered including Sweden, Denmark, and Finland as well as Norway.

The way of the transgressor remains similar to that of the pedestrian.—Kingston Whig-Standard.

Keep Minard's in the Medicine chest.

And Have a Clear Skin

Gently anoint the afflicted part with Cuticura Ointment. Wash off in five minutes with Cuticura Soap and hot water and continue bathing for some minutes. Pimples, eczemas, rashes, and irritations are quickly relieved and healed by this treatment. Cuticura-Talcum is fragrant and refreshing, an ideal toilet powder.

Western Representatives:

HUNTER-MARTIN & CO., REGINA, SASK.

HON. R. FORKE GIVES HIS VIEWS ON IMMIGRATION

Ottawa.—The national development immigration scheme proposed by General A. D. McRae (Conservative, Vancouver North) is so vast and expensive that it should be carefully analyzed, declared Hon. Robert Forke, minister of immigration, in the House of Commons when he replied, for the government to the Vancouver member's want of confidence motion, which calls for the immediate reorganization of the department of immigration and colonization, moved in the House.

So far as he himself was concerned, he had his doubts as to the practicability of the McRae scheme, said Mr. Forke.

At least, Mr. Forke said, the member for North Vancouver had had something to offer on the subject of immigration, and his remarks were not negative in character. It was not hard, though, for a person to sit down and evolve a plan of immigration. Mr. Forke did not believe, however, that any scheme involving the expenditure of many millions of dollars would be successful.

He did not think that the settler loaded up with too heavy a financial load, had nearly the same chances for success as one who proceeded slowly. He saw difficulties in respect to the cost of clearing the land in the Peace River district.

He did not wish to say that he was opposed to immigration, Mr. Forke continued. Immigration of the right sort was essential. What he did object to was the bringing to Canada of a greater number of persons than could be absorbed in the industries of the nation at their rate of growth and expansion.

In order to alleviate the fear that Canada was becoming overrun with a foreign population, Mr. Forke asserted that 75 per cent. of the present Canadian population was Canadian born, 12 per cent. British born, and only ten per cent. was of foreign origin.

He would answer the allegation that thousands of Canadians had left Canada for the United States in recent times, by showing, he said, the comparison between present day emigration, and that of 1924. In 1924, 148,660 immigrants had come to Canada, while 159,058 had left for the United States. Certainly the tide had changed. Even if the Washington figure of 72,660 were correct, and he doubted its correctness, the number of persons leaving Canada for the United States today, had been decreased very materially.

Power Permit Given To British Company

For Development Of White Mud Falls In Manitoba

Ottawa.—The Dominion government has granted a permit for the development of White Mud Falls, in northern Manitoba, to the British Dominion Power Company (Canada). This was announced at the office of the minister of the interior.

It is understood that the permit is to continue in force for one year and if at the end of that time the company is prepared to proceed with development, a lease will be issued. The permit was granted following an expressed request of the Manitoba legislature. A resolution, moved by Premier John Bracken, requested that a priority permit be granted the British company.

Seeding Delayed In Ontario

Late Spring and Cool Weather Is Worry To Farmers

Toronto.—Apprehension over the backward spring season is being felt generally among farmers throughout the western and south-western parts of Ontario. Farmers are becoming much concerned over the delay to seeding caused by heavy rain and continued cool weather. In most instances throughout this section of the province seeding is from ten days to two weeks behind and in some districts three weeks.

The Niagara fruit district has not reported any appreciable damage to trees and vines, but practically all farm crops are delayed.

Workman Killed At Victoria
Victoria, B.C.—Charles Watson, of Vancouver, was instantly killed when he fell from the fifth floor of the new addition to the Empress Hotel, a distance of 100 feet. He was an employee of the Dominion Bridge Company.

W. N. O. 1387

Clergy and Tobacco

Heated Discussion Takes Place At Meeting In Toronto

Toronto.—Stormy scenes developed here at a meeting of the Toronto Centre Presbytery of the United Church over the adoption of a report by a special meeting on the use of tobacco by ministers.

Heated discussion took place regarding a section of the report which read: "That the Christian character of those who regard the use of tobacco as an innocent gratification should not on that account be impugned."

Dr. J. Kerr denounced the use of tobacco and objected to the adoption of the committee's report. "I cannot accept Dr. Bland's report," said Dr. Kerr, "for it implies that the use of tobacco is an innocent gratification. I do not believe it is. I think it is a venal habit." He presented a resolution, later adopted, which deplored the effect of tobacco on the youth of the country.

Rancher Uses Airplane

Fires From Montana To Saskatoon For Calf-Feeding Competition

Saskatoon, Sask.—G. G. Ross, of St. Kitts, Alta., who has a ranch of more than 200,000 acres on the borders of Saskatchewan, Alberta and Montana might be called "the flying rancher."

He arrived in Saskatoon last week from Great Falls, Montana, by plane accompanied by two other men, E. T. Vance, of the Great Falls Airway Company, and R. Laidlaw, of Medicine Hat, Alta. Mr. Ross flew here from Chicago and Great Falls to see what progress boys and girls of this district were making in a calf feeding competition for which he supplied 1,000 calves last fall. The calves will soon be brought back to Saskatoon as prime baby beef. The competition is being sponsored by the Saskatoon Board of Trade.

One-Year-Old Stowaway

Was Hidden On Liner But Discovered By Customs Officials

New York.—Elisa Valerio, one year old, and said to be the youngest stowaway ever apprehended at this port, at Ellis Island, in the discolored solate colony of immigrants who will have to go back to "the old country." Customs men discovered Elisa as her mother, Maria Dolores Valerio, a Portuguese stewardess of the liner President Wilson, was trying to carry her ashore hidden under a shawl. Elisa made most of the trip hidden in a linen closet.

Supplied Gas For Zeppelin

Sufficient For Trip Back To Germany Obtained In France

Cues, France.—French naval authorities here supplied the German dirigible Graf Zeppelin with 3,000 cubic metres of hydrogen lifting gas. It was explained that the ship's lifting gas supply had been carefully apportioned to the load to be lifted and which, while sufficient for the trip to America, was not sufficient for the three additional persons aboard who intended flying back to Friedrichshafen in the dirigible.

Urged To Pay Interest

Montreal.—The government of Canada should pay interest on all money held by it and refundable to citizens, such a course is required by equity as the government enjoys the use of such money pending repayment on account of taxes, etc. So states a resolution adopted by the Canadian Chamber of Commerce and sent to all members of the House of Commons and the Senate.

Was Lonely

Toronto.—Becoming depressed through loneliness, an English domestic employed in a local hotel who had been in Canada only a week, put long distance telephone call to her folks in London. Her employer announced that the \$50 costs for the phone call will be deducted from her wages.

Postmen In Civil Service

Ottawa.—V. C. Phelan, president of the Civil Service Federation, has announced that the Federated Association of Letter Carriers has affiliated with his organization. The Letter Carrier's Association has been in existence for some 35 years. They withdrew from the Civil Service Federation seven years ago.

All Had Same Name

Battle Creek, Mich.—On one day recently three residents of this city named Carpenter, died—Orren G. Carpenter, 34, Frank H. Carpenter, 45, and Adelbert Carpenter, 50. The three men were not related.

A Day Of Thanksgiving

June 16 Is Unofficially Announced As Date Of Thanksgiving For Recovery Of King

London, England.—It is understood that Sunday, June 16, has been selected as the date that King George will appoint as a day of thanksgiving for his recovery from his recent grave illness.

The programme as unofficially forecast, contemplates a special service at Westminster Abbey, attended by the King and Queen and other members of the royal family, to which the public will be admitted.

It is recalled the King, in a special message from Craigwell House on April 22, said he looked forward to joining with his people "on some appointed day" in thanking God not only for his own recovery, "but for the new evidence of growing kindness significant of the true nature of men and nations."

Seeking Air Mail Route

Swedish Aviator Thinks U.S.-Scandinavian Summer Service Possible

Stockholm.—A possible summer route for air mail service between the United States and Scandinavia is being sought by Capt. Albin Ahrenberg, Swedish flyer, who hopes to set out about June 3, on a three-stop flight from Stockholm to New York. Ahrenberg believes it is practicable to operate an air mail service along the northern route between mid-April and mid-September.

The hop, skip and jump trip to New York should take about three days, Ahrenberg thinks.

CANADA WILL NOT BAN LIQUOR CLEARANCES

Ottawa.—The government of Canada is not disposed at present to accede to the request of the United States that clearances be prohibited on liquor shipments, destined for that country. The door, however, is not closed and the Dominion government is ready to give consideration to such representations as it may receive on this important matter.

The attitude of the government on the question of refusing clearance to liquor cargoes was indicated in the House by Hon. W. D. Euler, minister of national revenue. Mr. Euler spoke in reply to speeches by J. S. Woods, Labor, Winnipeg North Centre, and others in the Progressive and U.F.A. ranks, in which the statement was made that Canada was guilty of an unfriendly act in not acceding to the United States request. Demand for government action on the matter has been indicated by the presentation of numerous petitions during the session requesting the refusal of clearance to liquor shipments.

The minister pointed out the difficulties which inevitably arose when a country law was located next door to one which permitted the manufacture and sale of liquor.

He expressed doubt as to whether refusal of clearances would result in stopping the flow of liquor into the United States. He pointed out that if Canada was to amend the Customs law so as to refuse clearances to liquor shipments, this country would require a new and larger preventive force in order to enforce the law.

DELEGATE TO INTERNATIONAL AIR SUFFRAGE ALLIANCE

Hon. Mary Ellen Smith, of Vancouver, the first woman to be appointed to a cabinet office in the British empire, who will address the International Suffrage Alliance in Berlin.

Submarine Disasters No Longer Possible

Naval Officers Consider Demonstration Of Rescue Great Success

Colon, Canal Zone.—For the first time in the history of the United States a navy submarine and its crew were raised from the bottom of the sea in Panama Bay. On May 17, the S-11 went down to a depth of 87 feet, was found by the submarine S-12, and was raised by the rescue ship Mallard a few hours after going to the bottom.

Naval officers here were so impressed with the demonstration that they said no disaster such as followed the sinking of the S-51 or the S-4 was now possible. The S-12 caught the signals just one hour after the first call from the S-11. Then the rescue ship Mallard started for the spot and sighted submarines at 10:30 a.m. Twenty-five minutes later a grapple had been hooked on to the sunken submarine.

Resigns Chancellorship

Sir Robert Borden Has Tended Resignation As Head Of Queens University

Kingston, Ont.—Announcement was made at Queens University that the chancellor, Sir Robert L. Borden, had tendered his resignation.

Canada's war-time prime minister was elected to the chancellorship five years ago to succeed E. W. Beatty, K.C., who was chosen as chancellor of McGill University, Montreal. Sir Robert presided at the convocation of arts and sciences graduates at the university nearly two weeks ago. The name of James Richardson, of Winnipeg, is being prominently mentioned as a successor to Sir Robert, although nothing has been said at the university. Sir Robert's resignation will be considered by the senate and the trustees of the university.

Amend Bankruptcy Act

Ottawa.—Second and third readings were given in the Senate to a measure amending the Bankruptcy Act. Senator Jacques Bureau, the sponsor, explained that the purpose of the bill was to require persons seeking to have debtors adjudged bankrupt to take legal action in the judicial district of the alleged insolvent.

EXPRESS SHIPMENTS BY AIR

Express shipments between Canada and European Continental countries are handled in part by air service under an arrangement reached between the Canadian National Express and the Imperial Airways, the French Air Union, the C.I.D.N.A. of France and other important continental airlines. The first shipment thus handled was flown recently from Croydon Aerodrome, near London, England, and consisted of a small lot of valuable Canadian furs shipped from Canada for a Paris sale.—Canadian National Railways photograph.

Joint Radio Control

Plan Is Endorsed By The Royal Society Of England

Ottawa.—Joint control of radio broadcasting by the federal and provincial governments, with special preference given to educational programs, public information and entertainment, was endorsed as the best policy for the Dominion at a session of the Royal Society of Canada.

Another feature of the day's proceedings was the defeat of a recommendation submitted by a sub-committee which would have limited the printing of scientific papers in the official journal of the society.

The decision concerning radio control, made in response to a request by the Royal Commission on radio for the society's opinion, was reached largely as the result of a report made by Dr. H. M. Gray, head of the Federal Research Council.

Mgr. Camille Roy, rector of Laval University, delivered his presidential address, in which he cited the society as a model for development of co-operation among all the races and in intellectual spheres from coast to coast in the Dominion.

Following his address, Mgr. Roy presented the Sir Joseph Flavelle medal for outstanding work in science to Prof. George M. Wrong, University of Toronto. Mgr. Roy himself was made the recipient of the Lorne Pierce medal for excellence in pure literature, especially French-Canadian literature.

Trouble In China

British Prepare Defenses In City Of Canton

Canton, China.—British sailors landing from gunboats in the harbor in the Shamene quarter immediately began construction of defenses in various parts of the English concession.

Gates and bridges were closed and guards were posted. In the native city the utmost tenesness prevailed with attacking Kwangsi troops known to be not far away, although there was no definite word as to their position. Sacking of the city, the largest in Southern China, was feared in the event of capture by the red Kwangsi element which was believed imminent.

THREE MEMBER GRAIN BOARD IS SUGGESTED

Ottawa.—In order to give Leslie Boyd, chairman of the grain commission, and Matthew Snow, who is a member, an opportunity to confer over recommendations they will submit to the agricultural committee of the House of Commons, the committee met only a few minutes this afternoon.

It was explained by Hon. James Malcolm, minister of trade and commerce, that the two commissioners, who are witnesses before the committee have not had an opportunity to talk matters over, because Mr. Snow has been in the West and Mr. Boyd has been undergoing treatment in Montreal.

A three-member grain board, with headquarters at Winnipeg and some six sub-commissioners of field men to inspect elevators, deal with complaints and to investigate conditions in the various grain growing districts in Western Canada were urged by Mr. Boyd.

The sub-commissioners would be located at Edmonton, Calgary, Regina or Moose Jaw, Northern Manitoba and Southern Manitoba. There should also be additional elevator inspectors for the rush seasons. Three members of the board would be better than five as proposed, he thought. The members should meet often so that uniformity in its decisions could be obtained.

Mr. Boyd agreed with the suggestion that one member of the board visit the markets of Europe each year so that each member would get overseas views once each three years. He thought the situation with the staff of the board under the civil service commission was fairly satisfactory.

As to the claims of Regina for the headquarters of the grain board, Mr. Boyd agreed Regina was more nearly the centre of the prairie grain growing districts than Winnipeg, but most complaints had to be adjusted to the company headquarters, which were at Winnipeg. It was for this reason he favored Winnipeg.

CHANGES IN THE GRAIN ACT ARE RECOMMENDED

Ottawa.—Changes in the Canada Grain Act were recommended to the consideration of the agricultural committee of the House of Commons by the board of grain commissioners, Leslie Boyd, chairman, and Matthew Snow, members of the board, were before the committee to explain and amplify their suggestions. The committee will further discuss these recommendations.

Many of the changes in the act suggested by the board would increase its power as against the present provisions requiring the order of the government-in-council. The changes would facilitate the administration of the act without so often appealing to Ottawa.

Another recommendation was that the testing laboratory be under the supervision of the National Research Council instead of the grain board.

Although it was pointed out that the rate of commission charged on selling grain was fixed by the Winnipeg Grain Exchange, the committee took the view that the act should not be changed to relinquish such right of the board to regulate such charges if the occasion arose, when it would be advisable.

The question of the "hybrid" tickets blazed up just as the committee was completing its session. The board had been blamed on many occasions this year for not refusing to allow these tickets to be issued on the grounds that the act should not be changed to give the farmer the right to designate the terminal to which the grain should be shipped.

Not Sufficient Evidence

Crown Not In Position To Make On Good Case Against Bronfman

Ottawa.—There is not sufficient evidence in the possession of the Crown to warrant the prosecution of Harry Bronfman for liquor irregularities. This statement was made in the House of Commons by Hon. Ernest Lapointe, minister of justice. The minister's statement was as follows:

"The department of national revenue transmitted to the department of justice the findings of the customs commission on the case of Harry Bronfman, and upon consideration of the same, proceedings were instituted by the department of justice, but in the case of Harry Bronfman, the department reached the conclusion that while, as a result of the commission, there might be a prima facie case on the facts, the crown was not in a position to make out a good case in law, and that opinion was expressed to the department of national revenue by the deputy minister of justice."

Ask For Oxygen Tents

Were Urgently Needed For Victims Of Cleveland Disaster

Cleveland, Ohio.—An urgent appeal to all large cities near Cleveland for oxygen tents to be used in treating the victims of the Cleveland clinic disaster which took 122 lives was telegraphed by officials of the Cleveland clinic hospital, where fifteen patients were reported critically ill.

Seven of the tents were now in use and at least eight more tents were needed, the telegrams said. Altogether thirty patients are in hospitals, their systems poisoned by the gas which twice exploded in the clinic building after the fire broke out in a basement X-ray storage room.

Aims To Make Good

Man From England Has Determination To Win Out In Canada

Toronto.—"Worth '20,000 quid' (\$20,000), as he termed it, George Westbury, of Ascot, England, arrived in Toronto with £3 in his pockets, determined to prove to England's submerged classes that a man with pluck and determination can make good in Canada.

"I have two pounds in my pocket now," he said, "and I'd rather put a shot through my head than scuba home for more money."

Promise To Be Good

Des Moines, Ia.—Dean E. C. Calloway, who presented students and faculty of Des Moines university at the meeting of the Baptist Bible Union of North America, in Buffalo, N.Y., has obtained a pledge from the students that there would be no more rioting or violence when the trustees return.

Fighting Insect Pests In Canada

Estimated Cost Of Depredations Is Over \$100,000,000 Annually

The Dominion Entomologist, Arthur Gibson, estimates that in the aggregate insects cost Canada well over \$100,000,000 annually. This is the loss to field and fruit crops and to it must be added the loss to forest and shade trees, stored produce, etc. While these latter losses are difficult to estimate they easily average over \$30,000,000 a year.

Insects are costly, their control one of the greatest problems with which any country is confronted.

The chief of the bureau of entomology in the United States recently made the statement, "It has become strikingly obvious that insects are collectively the most important enemies of humanity on the earth. It has become perfectly plain that if human beings are to maintain their hold on this globe, if they are to continue to exist, they must learn to control insects."

That seems to be the recognized situation, and to back the Dominion Entomologist's account what has been done by the federal department of agriculture in an effort to control insects, shows that the authorities are fully alive to the seriousness of the situation.

The economy of such control work is well illustrated in the case of Bark Beetles in Yellow Pine. These insects threatened the forests of yellow pine in British Columbia with complete destruction about six years ago. The federal and provincial departments of agriculture co-operated in control work, and destroyed more than 50,000 beetle-infested trees. The cost of these operations amounted to \$100,000, and the yellow pine which stand saved from total destruction are worth \$6,000,000.

A similar story might be written respecting grasshoppers, the Oriental peach moth, the apple maggot, hop insects, the pear psylla, apple bud moth, woolly aphid, the western cedar borer, wireworms, cutworms, white grub, etc., etc. It is a case of war to the death of the insects, in order that man may live.

The entomological branch is protective in every sense of the word, and the destructive insect and pest act, which the branch administers, is one of Canada's most important legislative measures, based as it is on the fact that the best way to control dangerous insect pests and plant diseases is to prevent their introduction.

Nations Must March Together

Britain Cannot Do All Debt Paying and Disarming Says Baldwin

"Foreign nations must not expect Great Britain to do all the disarming and debt paying," declared Premier Stanley Baldwin, in a campaign speech at Monmouth, when he discussed the work of the League of Nations.

"That is not the spirit of the League and covenant," he went on. "We have all got to march forward together and we will march with the quickest, as we have been doing. We are marching a little quicker at the moment, but the other nations cannot lag indefinitely behind. The last thing we want to see is Europe split once more into hostile camps."

Alberta Gas Production

Figures published by the department of the interior show that Alberta's natural gas output in 1928 totalled more than 14,198,959 million cubic feet. During the coldest day of the year, January 26, Calgary used 54,000,000 cubic feet with a peak hourly demand of 60,000,000 cubic feet per day. On several other days of the same week approximately 48,000,000 cubic feet were delivered and consumed in the city.

It isn't what a woman says that influences a man, but the way she says it.

"Everybody has one foot smaller than the other."
"With me it is the opposite. I have one foot larger than the other."
—Moustique, Charlier.

W. N. U. 1787

Helpful Hint To Gardeners

Vegetable Plants Should Be Thinned Out When They Are Small

Beginners in vegetable gardening are almost sure to make the mistake not only of sowing seed much too thickly, but also of leaving the plants too thick in the row. A very large amount of seed is wasted each year because of this and failure to have plants develop properly is another result of more consequence to the sower of the seeds than the waste of seed. Thinning of all vegetable plants is desirable as soon as the plants are large enough to catch hold of, that is, quite small. Lettuce can be used even though the plants are thick, but to have satisfactory individual plants of leaf lettuce the plants should be thinned to five or six inches apart, and the plants of head lettuce should be thinned to eight inches or more apart. They will not develop satisfactory heads if much closer than this. It has been found in the Horticultural Division, Experimental Farm, Ottawa, writes W. T. Macoun, Dominion horticulturist, that the larger varieties of head lettuce give the most satisfactory results when the heads are nearly one foot apart. Carrots should be thinned to about an inch and one half apart, those in two inches apart; parsnips to two inches apart; onions to one inch apart; spinach four to six inches apart. Radish if sown rather thickly are thinned as ready for use. Often too many kernels of corn are left in a hill. Five plants are kept sufficient to leave after the cutworms and birds have taken their toll. Bean plants should be from two to four inches apart, and peas about one inch apart.

Vegetables will not develop satisfactorily if the plants are thick, hence judicious thinning is very important.

The Realm Of Fancy

People Who Make Believe Escape Drabness Of Daily Round

David Copperfield tells us how he consoled himself in his lonely childhood by impersonating his favorite characters in fiction. He went about for weeks as a valiant Captain of the Royal Navy, in danger of being beaten by savages, and resolved to sell his life at a great price. The Captain never lost dignity by having his ears boxed with the Latin grammar, for he was a captain and a hero, in spite of the grammar in the world. There are still hundreds of children who live with an unseen playmate, or impersonate someone else for weeks at a time. The secret is often kept profoundly, for fear of ridicule; but those in close touch with children can sometimes get a glimpse of their wonderland. It is good for us all to be reminded of it now and then; and, if the truth were known, many a grown-up still shares his hopes and fears of the grammar in the world. There are still hundreds of children who live with an unseen playmate, or impersonate someone else for weeks at a time. The secret is often kept profoundly, for fear of ridicule; but those in close touch with children can sometimes get a glimpse of their wonderland. It is good for us all to be reminded of it now and then; and, if the truth were known, many a grown-up still shares his hopes and fears of the grammar in the world.

Something Was Flying

It had been a tiring case for everybody concerned. The plaintiff and the defendant were both slow-witted, and everything had to be explained to them at least twice.

"Do I understand, my man," said the magistrate at one point, "that the defendant hurled investives at you?"

The plaintiff scratched his head slowly. Then a look of understanding dawned in his eyes as he replied: "No, sir, to tell the truth, it was only bricks he threw at me; but what I complained about was the terrible way he swore at me when they missed."

Very Descriptive

It was visiting day at the insane asylum. One of the inmates imagined himself to be an artist, and he was busily engaged with dabbling at an empty canvas with a dry brush. A visitor, wishing to humor him, asked what the picture represented.

"That," said he, "is a picture of the Israelites being pursued through the Red Sea."

"Where is the sea?"

"Why, that's rolled back to allow the Israelites to pass."

"They've just gone by."

"Then where are their pursuers?"

"Oh, they'll be along in a minute."

Teacher—What is a prescription? Jimmy O'Brien—That's a piece of paper the doctor gives you and then you go to the drug store and get whiskey with it.

"I understand your son has been in Italy for some time."

"Yes, indeed he's become quite italicized."

The Storing Of Eggs

New Methods Of Handling Has Greatly Improved Quality Of Storage Eggs

This is the season of heavy egg production when stocks not required to meet the daily demands are going into cold storage to be brought out for use when production is low. The storing of eggs is greatly improved in recent years, so much so indeed, that stored eggs are no longer looked upon with suspicion and doubt. Eggs that go into storage have to be submitted to the candling process which determines definitely their quality. Only those that are in prime condition are ever put away in storage quarters. The modern cold storage for eggs is a highly sanitary place not only in its cleanliness, but also by reason of the manner in which it is maintained. The temperature is held at all times close to the frost line and of such consistency with respect to moisture as to reduce evaporation to the smallest degree. Only eggs are graded when put in, but the regulations governing eggs, covered by "The Live Stock and Live Stock Products Act," administered by the Department of Agriculture, at Ottawa, require that they should again be graded when they are brought from the storage chamber to go into commerce.

The usual egg cold storage in Canada is what is known as dry cold storage into which eggs are placed in their natural state. In Western Canada many of the eggs are put through an additional process before being placed in the storage quarters. The fresh eggs are immersed for an instant in hot oil which not only sterilizes but seals up the shell, preventing evaporation from within and contamination from without. After treatment in this way the eggs are put through a sand blast machine which removes the excess oil and restores the bloom of a fresh egg. They are then cold stored in the usual way. With the marketing of only graded eggs, whether fresh from the farms or out of storage, the losses from bad eggs has been almost eliminated in egg merchandising.

Egypt Has Large University

Number Of Students Is To Be Reduced To Five Thousand -

One of the biggest universities in the world, if it may properly be called a university, is that of Al Azhar, at Cairo, Egypt. It has no fewer than 14,000 students.

But the students pay no fees and the professors get no salaries. The teachers make their living by private teaching while the students make their way by copying manuscripts or reciting the Koran. The teaching has been largely limited to the Koran, for it is an Islamic school. Church doctrines and decisions in church law affecting all members of the community are not taught at the university. The plan now is to modernize the school and raise the standard, and the first rule adopted was that the number of students should be limited to 5,000.

"Loan me five dollars, will you?"

"Sorry, but I have but four dollars and seventy-five cents."

"Well, give me that. I'll trust you for the other quarter."

Wolf: "The doctor said he would make a diagnosis of my case. What's a diagnosis?"

Lewis: "It's the Latin term for 'five hundred dollars.'"

"What is your son taking at the university?"

"All we can send him."

Bright Package

Little Sheila Watson, of Winnipeg, is very proud of the fact that she was a passenger on the "Metagama" at the age of three years. She has disguised herself as a parcel and plastered herself with C.P.R. labels, but the one on her cap reads "Wanted," as one supposes she is.

The Value Of Suggestion

Rural Paintings Would Instill In Children Love Of Farm Life

Sea pictures have long been the source of inspiration to wanderers, who have answered the call of the deep by going down to the sea in ships, reads an article in the May issue of "Successful Farming." It is suggested that paintings of rural scenes, especially animals, may instill the desire in a child to become a farmer.

"It would seem that parents who are desirous of having their boys and girls remain on the farm, choosing a country environment in which to spend their lives, should not overlook the aid that certain pictures may have in influencing their children. Pictures of animals, and of landscapes that depict the peace, beauty, and charm of rural scenes, are surely the most suitable for all lovers of the country to hang in their homes. This type of picture has been painted by many great artists, and colored reproductions of them can be obtained at a very moderate price."

"There are so many suitable pictures that only a few can be named such as 'Horse Fair,' 'Ploughing,' 'Sheep,' 'Springtime,' 'Cow and Calf,' and 'Horses at Watering Trough.' Then there are the beautiful pictures of lovely landscapes that cannot fail to charm every lover of rural scenes: 'Hay Wain,' 'Landscape,' 'Landscape With Cattle,' 'Harvest Wagon,' 'Berkshire Hills,' and 'Autumn Oaks.'"

Nature a Good Provider

Natural gas from 250 miles away will soon boil the potatoes in San Francisco and other California cities brought thither through pipes welded at the joints so as to form a continuous line. Old Mother Earth is always a good provider if only a little co-operation is given her.

Hydro-Electric Energy

The daily average generation of electric energy from water power in Canada was 46,475,000 kilowatt hours in March, an increase of nearly 9 per cent. over the same month of last year.

The Illustration Stations

Purpose Is To Demonstrate the Varieties Of The Different Crops

Answering a question about the operation of the illustration stations supervised by the Experimental Farms Branch, asked by a member of Parliament in the House of Commons, the Hon. Dr. Motherwell, Minister of Agriculture, explained that the government does not operate the 186 illustration stations distributed over Canada, but the Department does give the operators some assistance. He said, "The illustration area of man's farm includes only that part of it fronting on a well traveled road and varies in area from eight or ten to forty acres. For the privilege of saying what crops shall be grown, what rotation shall be followed, and how and when cultural operations shall be performed, the Department pays the owner or operator a small amount (\$5 per acre) each year. The purpose of these stations is to demonstrate the varieties of the different crops, the cultural methods and the rotations that have been found to give the best results on an experimental farm or station where conditions are judged to be similar to those which maintain on the illustration station under consideration."

"The crops harvested off these illustration stations are of course the property of the men operating them."

A Subject For Thought

Prejudice Against Immigrants From Europe Not Always Justified

Six years ago a Russian immigrant boy, Leo Malania, landed in Canada. He was utterly ignorant of English. Recently in Toronto, competing with fifteen Canadian-born boys of English ancestry, all champions of their district, he won an oratorical championship of Ontario. His subject, significantly enough, was "The Unification of Canada." This should give us thought. We have people among us, well-intentioned and sincere, who would bar out all immigrants unless from the British Isles. They may be right; but when one thinks about the young Russian, Leo Malania, and the subject of the discourse with which he achieved his triumph, it challenges doubt.

After all, the great nations of the earth did not achieve their present status by keeping their breed pure. They are, on the contrary, a mixture of many races.

The application of a little history to some of Canada's problems might lead to a lot of good.—Ottawa Journal.

A Flattering Likeness

Sandy had recently had his photograph taken, and, being pleased with it, took it round to show a friend at the same time asking his opinion. His friend looked it over very critically, and casually remarked: "Rather flattering, isn't it?"

"Flattering?" said Sandy. "What makes you think that?"

"Well," replied the other, "I see you have your hand in your pocket."

Airplanes In Rail Survey

The Dominion government will lend two airplanes to assist in the joint survey of the Pacific Great Eastern Railway, which is being made by the province of British Columbia and the Canadian National Railways and Canadian Pacific Railways.

Canada ranks third in importance as a source of metals of the platinum group, after Russia and Colombia.

Sulphur Dusting For Rust

Application Of Sulphur Greatly Reduces Loss From Rust

While production by breeding of rust-resistant varieties of wheat is now regarded as the most likely method of relief from losses from rust, it has been proved that applications of sulphur dust to the growing crop will greatly reduce the rust infection. The botanical division of the experimental farm at Ottawa has carried on dusting experiments in Manitoba. In 1929 preliminary experiments were carried out by a horse drawn duster. Further work was done in 1927. Marquis wheat was sown on June 10 in four-acre plots separated by seven-foot roads. Dusting began on July 18, and was continued for eight weeks. One plot was dusted twice a week at the rate of 15 pounds per acre. Another received eight weekly applications at the rate of 30 pounds per acre. In the third plot dusting was delayed until the 15th of August. It was then dusted at the rate of 45 pounds to the acre at each of three weekly applications. The fourth plot was not dusted. The method of doing the work, and the results are contained in section III. of the report of the division of botany of the experimental farms for 1927. The plots that received two applications a week of 15 pounds to the acre for eight weeks gave a much better crop than the undusted check plot. The increase in yield was 38.7 bushels to the acre of wheat that graded number 4, as compared with feed wheat from the check plot. The low grade from the dusted plot was due to unfavorable weather conditions including frost. Even the plot that received the four weekly applications at the rate of 45 pounds to the acre yielded 11 bushels per acre more than the check plot. From the standpoint of net returns the weekly applications of 30 pounds per acre proved the most profitable, the net increases in value per acre due to dusting being \$15.28. While this experiment was in progress, the dusting can be depended upon as an economic practice, the experiment does show that applications of sulphur dust when heavy enough and applied sufficiently often will control rust in growing wheat.

A Big Wheat Field

Prairie Provinces Produce Over Ninety Per Cent. Of Wheat Grown In Canada

Throughout Western Canada farmers have been busy sowing one of the world's largest wheat fields, for it extends over about 22,000,000 acres. Last year the Dominion produced 533,571,700 bushels of wheat from 24,119,140 acres, over ninety per cent of which was grown in the three prairie provinces—Manitoba, Saskatchewan and Alberta. This year it is estimated about 25,000,000 acres will be sown to wheat in Canada.

What is one of the most important food products in many countries, and the Dominion is one of the world's chief sources of supply. Canada is the largest exporter of wheat and sells it to 47 countries.

More than half the crop is marketed by the Canadian Wheat Pool, a farmers' co-operative marketing organization, the largest of its kind in the world.

To Canada, wheat has been a veritable economic fairy. No other crop or natural product has exercised such a vitalizing influence upon the commercial life of the country as wheat, and it still ranks first.

Canada is the best customer of wheat in the United States and the extent of the buying power of Canada in the United States depends to a large extent upon the wheat crop.

"Why are deeds better than words?"

"You can get a mortgage on a deed."

"She's rich now — her father struck oil."

"And she now does nothing but gush."

"How do you manage to fish at night?"

"I use glowworms for bait." — Gutierrez, Madrid.

Vancouver Base of Large Coast Fleet

Tourist travel is showing an early upward swing on the Pacific Coast, with many travellers utilizing the splendid fleet of the British Columbia Coast Steamship Service. The above photograph taken in mid-April, shows the second largest pier on Granville Street waterfront, every inch of docking space occupied by Canadian Pacific steamers plying the triangle Vancouver-Victoria-Seattle route, and the Alaska West Coast and Gulf Islands runs. Beginning at the left front of the pier, the ships are:—"Princess Adelaide," "Princess Victoria," "Princess Mary," "Princess Royal," "Princess Elaine," "Princess Alice," "Princess Nora." The latter ship shown in the right foreground, is the new West Coast vessel which carried the recent vice-regal party on their coast cruise.

Commercial Fertilizers Must Be Produced In Increasing Amount To Maintain Present Crop Yield

The astonishing computation is made that if the farmers of Canada were to entirely replace by chemical fertilizers the amount of plant food annually used it would entail a yearly expenditure of \$385,000,000. This figure, contained in a new report on "The Commercial Fertilizer Industry in Canada" prepared by the Natural Resources Intelligence Service of the Department of the Interior, at Ottawa, is not intended to create alarm but is merely informative. As a matter of fact the computation embraces the cultivated area of the Prairie Provinces where the soils are naturally very rich, and there is a division of opinion on the present need of fertilizers there. Without considering the three prairie provinces the fertilizer bill would nevertheless be very considerable amounting to over \$311,000,000.

The fact is stressed that such computations are theoretical and of no practical value except as pointing out the immense field open in time for the fertilizer industry in Canada. The aim of the report is stated to be to put before the Canadian public the latest view of experts in world economies that commercial fertilizers must be produced in ever increasing amount to maintain present yield and sustain a multiplying population and to show the amount of commercial fertilizer which Canada is using, might use, and may contribute to the world demand.

Contrasting with the value of the commercial fertilizer theoretically necessary to replace depletion of the soil is the actual figure of \$5,904,433 expended in Canada for purchased fertilizers in 1927. Though depletion of the soil is going on year after year the annual consumption of fertilizer in Canada is not increasing rapidly as is shown by the expenditure of \$4,408,330 in 1918. It is held that there is a boundless field in Canada for the manufacture of commercial fertilizers but that to reach the full benefit of the growing market awaiting the industry the Canadian demand must be strengthened by education of the farmer and in the rural schools, by practical demonstration of the value of fertilizers. Manufacturers, producers, and distributors need co-operation and the consolidation that other industries are finding necessary with a view to greater efficiency, uniform marketing and economy in production.

An interesting section of the 50-page mimeographed memorandum gives figures to show how the present low rate of yield of the larger crops compared with that in other countries might be profitably increased by the use of commercial fertilizer as advised by the Department of Agriculture. Prevailing tariffs and Dominion Acts regulating sale and manufacture of fertilizers are dealt with and a map indicates the location and names of producers of commercial fertilizers, and fertilizer materials, whether wholly or partly manufactured in Canada. Copies of the publication may be obtained free of charge from the director, Natural Resources Intelligence Service, Department of the Interior, Ottawa.

Brains To Spare
"We are given 10 times as much brain as we need. Very few persons use 50 per cent.," said Sir Arthur Keith, lecturing at the Royal College of Surgeons, London. He asserted that as a railroad bridge is constructed to carry a weight 10 times more than expected, so with the brain.

Tragic Policeman: "Say, do you know why I stopped you?"
Proud Father: "Oh, yes. You want to hear about the cute thing that baby said just before I left the house!"

"How is Antonio?"
"Very bad. Yesterday he had to sell his false teeth to get a bite to eat."—Buen Humor, Madrid.

Real Wealth At Home

Canadian People Will Not Find Better Opportunities Elsewhere

In January, there were 4,164 persons who came to Canada as immigrants, and 4,457 persons left the country as emigrants.

Assuming that persons move from one country to another to improve their positions in life, one is reminded of an utterance of an English writer, William McFee. In his recently published life of Frohisher, Mr. McFee remarks that while the Elizabethan adventurers were seeking gold abroad, and while Frohisher was taking back to England useless rock from Arctic islands, the real wealth of Britain was in the coal about one mile below the estate which Sir Martin was able to purchase in his later years.

Canada is a real land of opportunity. But unfortunately some of her people continue to think that opportunities are better in other lands.

Fashions
481
SMART TAILLEUR

Its tailored simplicity will appeal to good taste for general daytime wear, interpreted in silk crepe in naval dot pattern. The vivid plain silk crepe piping and stitching which emphasizes its classic tailored lines, is what makes Style No. 481 so smart. It is easily made, the pattern for which can be had in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. It is fashionable in angora jersey, in chardreuse green, plain washable silk crepe in violet shade, red and white gingham check in silk crepe, featherweight tweed in wood-violet tones in tiny check pattern, upstreak red crepe de chine, printed pique, navy blue crepe marocain, grasshopper green georgette crepe and blue-violet silk crepe. Pattern for this unusual model price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including smart ensembles, and cute designs for the kiddies.

Passing Of Oratory
There is a tendency on the part of modern auditors to want facts and to dislike excessive verbiage such as the old-time speaker indulged in. Times are changing, and have changed, and while there should undoubtedly be some attention paid to teaching the average student to talk before his fellows, it is doubtful if a lot of this effort on oratory is really justified.

Timber Consumption For Lumber And Pulpwood Compared

Figures compiled by the Forest Service of the Department of the Interior, afford a striking evidence of the manner in which Canada's forests have in late years been subjected to a heavily increasing demand for raw materials.

The timber consumption in the manufacture of lumber has shown no

pulpwood has risen to a point where it is equal to about 77 per cent. of that used for lumber and the trend, except for a slight reaction in 1920-21, has been generally upward. It is quite conceivable that a few more years may see the pulpwood industry outweighing the lumber industry in its yearly tax upon the Dominion's forest supplies.

very pronounced upward trend in the last decade or so, but the advance of the pulpwood industry has been responsible for changing the whole aspect of forest utilization. Twenty years or so ago the yearly pulpwood cut expressed in terms of standing timber, was equivalent to hardly 20 per cent. of the annual lumber cut. Today the timber consumption for

The main significance of this trend lies in the fact that with these two timber-using industries both developed upon a huge scale, the Dominion now has a vastly increased stake in good forest management. Forest conservation today should have behind it an infinitely stronger commercial incentive and support than ever before.

Making the Farm Popular

Learning Scientific Methods Proves Fascinating To Students

Pessimistic views as to the future of Canadian agriculture should have been dispelled from the mind of anyone who attended the winding-up dinner given to the pupils of the short courses which have been held. The enthusiasm that was evident among all the students proved that education in scientific methods of farming can be as fascinating as any other type of learning, when it is carried out under teachers who love their work and by boys and girls who are in a receptive mood. It is not hard to realize that the practical teaching which they receive at these courses is a good deal more attractive to the active minds of the young folk than is the laborious memorizing of "amo, amas, amat," or the struggle with a recalcitrant comic (not comic) section.

Larkes: "Does your wife like a pipe?"
Sparkes: "No, she doesn't smoke at all."
One kind of a failure is the man who has never yet tried to accomplish anything.

Leaning Tower Dispute Still Rages

Old Discussion Comes Up Again Regarding the Tower Of Pisa

"Why does it lean?"—that old, old question reverberating around the tower at Pisa—is again the subject of violent debate in Italy, says the Italy-America Society. There used to be two schools of opinion: One held that the tower was intended to lean from the beginning—a quaint conceit of the architect's; the other maintained that a subsidence of earth inadvertently caused the tilt. A third school is now busy converting the other two. Here is what really happened. The original architect intended it to be straight. When partially built it began to lean. The builders then offset the leaning by continuing the construction at an angle to balance. All agree, however, that Pisa's tower is strikingly beautiful and safe.

It takes 1,500 mules to hold an automobile together, but it only takes one to spread it all over the landscape.

Some people would have to work overtime if they practiced half of what they preached.

A HARD PAR 4

No. 8, Tekarra's Cut—430 yards, Par 4.

Many hopes for a fine score have been wrecked by hole No. 8 of the Jasper Park Lodge Golf Course, Jasper National Park, Alberta, over which the Canadian amateur championship of the R.C.G.A. will be played from August 19th to 24th this summer. It is a dog-leg with a high knoll to be negotiated before the second shot can be placed on a sloping green that is lightning fast and guarded by a deep grass covered ditch. The contour of this green is such that an error of a fraction of an inch in putting means disaster.

Co-incident with the Canadian Amateur, the Western Canada Amateur will be played over the Jasper Park Lodge Course, and this will provide plenty of competition for those whose high handicaps automatically keep them out of the Dominion event.

The upper photograph shows the fairway just below the elevated tee. Below is a sketch to scale showing the hole in detail. Play in the tournament will take place from No. 1 tee.

Saskatchewan Wheat Pool Conducting a Survey Of Wheat Grown In Province

Enough Business For All

Hudson Bay Route Will Not Affect Eastern Or Western Ports

Vancouver is rapidly growing as a grain port. Last year there was handled through the British Columbia metropolis 80,000,000 bushels, and this year, before the season closes, the 100,000,000-bushel mark will be passed. In 1900 the Government built a grain elevator in Vancouver. The politicians were laughed at and it was the butt of paragraphs. For five or six years it stood idle. In 1914 the Panama Canal was opened and the Government shipped an experimental shipload of grain via Vancouver and the Panama Canal to Europe. It proved a success. Since then the shipment of grain via Vancouver has steadily increased until this year it will top the 100,000,000-bushel mark. Now all of Alberta's grain seeks the markets of the world via Vancouver and Prince Rupert. The outlook is that all of the crop of the Peace River country will be shipped through British Columbia ports.

Yet, despite this huge flow via Western ports, the Eastern Atlantic harbors have all the grain they can handle. The Western crop is so increasing in size that there is business enough for all. Even if the Hudson Bay route proves feasible for shipping of grain to Europe, there is no need of either Atlantic or Pacific ports, nor any of the world the better for the world's granary.

Depends On The People

Churches In Russia Closed Only When Majority Favors Change

Five hundred and thirty-two places of public worship were closed in the soviet union in 1928. They were converted into clubs, public schools, boarding houses, libraries and reading rooms, ambulances and hospitals, cultural centres, or museums.

Two hundred and fifty-three more places are marked for similar conversion this year, but there will be plenty left for religious purposes. A recent survey showed that there were some 50,000 churches in all of Russia.

The places of worship are closed to religious purposes only when a majority of the local population favors the change. The initiative comes from local authorities. The 1928 list included 354 orthodox churches and 38 monasteries; 59 synagogues, 38 mosques, and 42 buildings belonging to various sects.

Waging War Against Gophers

Bounty Offered By Alberta Department Of Agriculture

Cash prizes ranging from \$1 to \$200 will be paid by the Alberta Department of Agriculture for gopher tails and feet and eggs of crows and magpies taken in Alberta on or before November 1. A special feature has been added to the bounties this year, also, for gophers and crows and magpies taken early in the season, and on or before June 30. Feet of crows or magpies will be credited with five points each; eggs of crows or magpies will be credited with five points each and tails of gophers will be credited with three points each prior to this date.

Oil From Bituminous Sand

Alberta Government Will Undertake A New Experiment

The Alberta Government intends to separate oil from a quantity of bituminous sand and to turn over to commercial institutions the oil produced in order that tests may be made, also to test the oil extracted from the sand shipments. There are also surveys planned under Dr. Wyatt, a water survey in charge of Dr. Rutherford and a Pre-Cambrian survey with Dr. Cameron in charge.

Need Packing Plant For Saskatoon

The Saskatoon Board of Trade is moving to develop the livestock industry in the region to the point of being able to support a packing plant. Commissioner J. H. Holmes recently pointed to the large increase in stock shipments from the city as significant of the growing need and necessity for a packing plant.

When bridge work is mentioned now you have to wait and see if it's teeth, cards, or viaducts.

The Saskatchewan Wheat Pool is conducting a survey of the varieties of wheat grown in this province. This work has been undertaken in conjunction with the provincial cereal committee, which was constituted in the spring of 1928 at the request of the pool, to bring about the desired uniformity of recommendations by agricultural authorities.

A questionnaire was sent out to 6,000 members of wheat pool committees. Approximately 2,500 replies have been received. Among the questions asked were the following: "What variety of wheat do you grow? Why that variety? What other varieties are grown in your district? Why are they grown? What variety is showing the most rapid increase?"

The replies are now being tabulated. The wheat pool has had the co-operation of the university, the provincial department of agriculture and the Dominion experimental farms.

Another piece of work has been undertaken by the Manitoba and Saskatchewan pools in co-operation with the Western Canadian Society of Agronomy and determining the extent of admixture of varieties and where such mixing takes place.

Simultaneously this year, in Saskatchewan and Manitoba, under the direction of the interprovincial committee of the Western Canadian Society of Agronomy, the wheat pools have collected samples of wheat: (1) as sown by farmers, (2) as delivered by farmers to country elevators, (3) as delivered by railroads at terminal elevators, (4) as loaded into lake vessels by terminal elevators, and (5) as delivered by ocean vessels to British markets.

The samples thus collected are being grown by the experimental institutions in the provinces along with pure samples of the wheat varieties grown to any considerable extent in western Canada. Milling and baking tests will be made from these pure samples and compared with similar tests made from typical mixtures of varieties as found in the various classes of wheat grown on experimental farms from the samples collected.

It is hoped by this work to arrive at an answer to the question as to who is responsible for the mixture of varieties which takes place between pure seed and the old country miller, and in what manner such mixture affects the quality of the flour.

Vancouver Airplane Factory

New Concern Will Commence Operations At Coast City

Establishment of Vancouver's first aeroplane factory will be undertaken at once following the merger of Hoffman-Beeching Shipyard Limited with the Boeing Aeroplane Company of Seattle, it is announced by Henry Hoffman, President of the British Columbia concern. The new company will be known as Boeing Aircraft Limited, of Canada. It will be a Canadian concern, using Canadian labor and material, the engines being manufactured in Montreal.

Know That One

Earl Beatty, of Julietan fame, tells this:

Two old-time sailors detailed for special duty away from their ship were making out a list of rations.

"Two pounds semolina," sang out Jack to his mate who was doing the writing.

"Semur—semur—ere let's ave taploca, 'Ow d'yer spell that?"

"Why, t-a-b-e—no, t-a-p-e-o-k. Well look, ere, put down rice."

"Right you are matey," said the one doing the writing. "Two pounds r-i-s-e."

Jim—Why did everyone cry during the death scene at the theatre to-day? They must have known that the actor wasn't dead.

Jake—That was just the reason.

"What are you playing there?"
"Heavens, I have been playing all the day."—Lustige Kohner Zeitung, Cologne.

Red Rose Tea comes direct to you from the finest tea gardens, then straight to your grocer—brimful of flavor and freshness. Every package guaranteed.

RED ROSE TEA

WORLD HAPPENINGS BRIEFLY TOLD

Dame Emilie Charlotte de Bathe, better known as Lily Langtry, left \$237,225.

Canada is the only Dominion, that recorded an increase in British immigration in 1928.

Without explanation of the delay, the post office has delivered to Clifford C. Gilbert of New Haven, Conn., a letter mailed October 15, 1912, in Hartford.

After an illness of many months, Senator Robert Watson, 76, pioneer of the prairies, and for years prominent in western political circles, died at the home of his daughter, Mrs. J. Hinton McGregor, Brandon, Man.

Word of the death of Peter Richter, engineer on the first train to enter what is now Vancouver, on May 23, 1887, was received by D. C. Oileman, vice-president, Canadian Pacific Railway, Mr. Richter died at his home in Vancouver.

Harbor improvement bills passed in the House totalled \$10,000,000 for Montreal Harbor; \$10,000,000 for Vancouver Harbor; \$5,000,000 for Halifax Harbor; and \$2,000,000 each for the harbors of Three Rivers and Chicoutimi.

The West Indies is considering establishing a trade commissioner in Canada, Sir Edward Davidson, chairman of the West Indies conference, stated at Ottawa. Sir Edward is investigating trade possibilities in Canada.

Among the entrance scholarships awarded at Upper Canada College, are: The Gordon Southam Number 1 (value \$600 a year for three years)—Robert Kay Gordon, Edmonton, Alta.; Number 3 (value \$600 a year for three years), Edgar Stanfield, Edmonton.

Alberta Has Surplus

Closes Fiscal Year With More Money Left Over Than Ever Before

Alberta closed the fiscal year ended March 31, with more money left over in the provincial treasury in excess of expenditures than ever before in the history of the province, \$1,817,871 being the exact amount, according to an announcement made by Provincial Treasurer Hon. R. G. Reid. The surplus for the previous fiscal period, ended March 31, 1928, was \$279,763, covering 15 months, because of the change of the fiscal year dates adopted last year.

The Board of Health

Strolling along the quays of New York harbor, an Irishman came across a wooden barricade placed around the enclosure where emigrants suspected of suffering from contagious diseases are isolated. "What's this boarding for?" he enquired of a bystander.

"Oh," was the reply "that's to keep out fever and things like that, you know."

"Indeed," said Pat, "I've often heard of the board of health, but be jabbers, it's the first time I've seen it!"

Corns disappear when treated with Holloway's Corn Remover without leaving a scar.

Production Of Asbestos

Canadian asbestos, which is of the chrysotile or serpentine variety, is practically all obtained from the Eastern Townships, Quebec.

Will Search For Italia's Crew

Norwegian Vessel Is Fully Equipped For Long Voyages

An Italian expedition headed by Gianni Albertini left Bergen aboard the Norwegian steamer "Succa," to search for the lost members of the crew of the Polar dirigible Italia, which crashed in the Arctic last summer.

The party of 18 men on the "Succa," which was formerly the Helman, will seek from Svalbard to Franz Joseph Land for the so-called "Balloons party"—the men who were carried away in the bag of the Italia after the crash. The men in the Italia's gondola, under Umberto Nobile, were rescued.

The "Succa" is fully equipped with sledges and dogs and wireless apparatus. The vessel stopped at King's Bay to take on more dogs before starting its long cruise. It is provisioned for 18 months voyage.

Italy Has Ambitious Road Building Program

Fifty Thousand Men To Construct Motor Highways

Because Premier Benito Mussolini has ordered it, Italy soon is to embark on the most ambitious road building programme any modern European state has attempted—perhaps the largest since the famous road builders of ancient Rome took their art into Italy. Within five years every corner of the peninsula will be accessible to the motorist. In all 40,000 miles of new motor highways are to be constructed. Fifty thousand men are to be engaged in working out the programme.

THE RESPONSIBILITY OF EVERY MOTHER

The child in the home is a never-failing source of joy, but, at the same time, a never-failing responsibility to the fond mother. It not infrequently happens that minor ailments of the child distress and puzzle her. She does not know just what to do, yet feels them not serious enough to warrant calling in the doctor. At just such times as these it is found that Baby's Own Tablets are the mothers greatest help and friend.

Most childhood ailments arise in the digestive tract—the bowels become clogged and the stomach sour. Baby's Own Tablets are a never-failing remedy for this condition. They are a mild but thorough laxative and through their action on the stomach and bowels they banish constipation and indigestion; break up colds and simple fever; allay the pain accompanying the cutting of teeth and promote health-giving sleep. Concerning them Mrs. W. Jennings Mackay, Ont., writes:—"I have used Baby's Own Tablets and think so highly of them that I would not be without them. Please send me your little booklet on the care of children."

Baby's Own Tablets are sold by medicine dealers or by mail, 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

Four Hundred Years Ago

Luther's Catechism Is Still Being Used In Lutheran Schools

While text books change often and few studies today are a decade old, one yet in use to celebrate its four hundredth anniversary with the Lutheran World Congress, June 22 to July 31, "Luther's Catechism" was written four hundred years ago, and still is used in Lutheran schools. The Lutheran church is the largest Protestant church. Its membership is estimated from 75,000,000 to 80,000,000, mostly in Northern Europe and America. The three books translated into most languages in the world are: "The Bible, in about 80 languages; 'Luther's Catechism,' in 137; 'Pilgrim's Progress,' in 107. The most translated hymn is Luther's 'A Mighty Fortress,' in 150.

A Munificent Gift

Mr. W. H. Askew, Of Scotland, Donates Large Sum To Aid British Colonization In Canada

The Department of Colonization and Development of the Canadian Pacific Railway announces a munificent gift on the part of Mr. W. H. Askew, of Ladykirk, Scotland, to the cause of British colonization in Canada. Mr. Askew, who is a gentleman of means and well known in Scotland for his broad public spirit, has provided ten thousand dollars to enable suitable families from the border regions of England and Scotland to emigrate to Canada and engage in agricultural work.

Forty of these families are now on their way from Great Britain, and their departure has received wide publicity in the British press on account of the original circumstances under which these families are being moved.

The fact that Mr. Askew has provided ten thousand dollars makes possible, under the provisions of the Empire Settlement Act, an advance of a further ten thousand dollars for the forwarding of suitable British families to Canada. The Act in question authorized the Secretary of State to co-operate with private organizations in formulating and carrying out schemes for affording joint assistance to suitable persons in Great Britain, who intend to settle in any of the Overseas Dominions. It is quite possible, therefore, that as a result of Mr. Askew's donation to assist prospective British colonists in the manner mentioned, three hundred families may be enabled to come forward to Canada. The number depends on the precise amount advanced to each particular family.

At Mr. Askew's request the Department of Colonization and Development of the Canadian Pacific Railway has entered into an agreement with the Secretary of State for Dominion Affairs for the recruiting, placement, agricultural occupation and all general administrative work connected with the scheme.

The families which will arrive during the next week-end will be on their way to arrival in Canada in place which has already been assigned; twenty-five families having been allocated to the Canada Colonization Association, subsidiary of the Department of Colonization and Development; others will occupy new cottages erected by the Colonization Association Branch of the Canadian Pacific, and the remainder on farms prepared by the Canadian Pacific under the agreement made last fall for the Overseas Settlement Committee.

Asked for his personal comment on this new scheme Colonel J. S. Dennis, C.M.G., Chief Commissioner of the Department of Colonization and Development, said: "I have no hesitation, whatever, in saying that Mr. Askew's munificent action is a strong reminder that the whole matter of the movement of British colonists to Canada calls for special efforts on the part of all organizations and individuals who are in a position to give up the important question. As is well known we have always concentrated our efforts on the largest possible number of British settlers to Canada, spending large sums in that connection, but due to conditions which have existed in the last few years and the administrative difficulties which seem to arise, now and again, under the apparently necessary numerous regulations which must be observed, results have been disappointing. The Askew scheme, however, as it is sure to be widely known in the future, marks a step forward in the progress of British colonization in Canada, and we are greatly pleased, of course, that Mr. Askew should have seen fit to ask us to join in this proposal, which is now eliciting much commendation in Great Britain, and will continue to reflect the greatest credit and satisfaction to its sponsor."

How To Dye An Old Rug

Successful Method That May Be Used In The Home

Old rugs may be dyed at home in a practical manner reads an article in the May issue of "Successful Farming."

"First of all, spread the rug out flat and scrub thoroughly clean with one can of rug soap and water. Let it stand for fifteen minutes and then spray well with cold water from the garden hose, or rinse with buckets of cold water. For a 9 x 12 rug use six packages of one of the standard, well known brands of dye designated for silk and wool mixtures. Set the color with a half pint of vinegar, full strength. The rug will take the dye nicely while still damp but the drying takes some time."

Peevish, pale, restless, and sickly children owe their condition to worms. Mother's Worm Expeller will relieve them and restore health.

A Logical Conclusion

Father—"Jimmy, why did you lick the little Jones boy?"

Jimmy—"You told me to."

Father—"I told you to! Why, my son, what do you mean?"

Jimmy—"Didn't you tell me the other day that it was more blessed to give than to receive?"

Father—"You told me to."

Jimmy—"Well, I had to give him a lick or receive one."

LATER EXPERIENCES OF JEREMIAH

Golden Text: "Blessed are ye when men shall reproach you, and persecute, and say all manner of evil against you falsely, for My sake."—Matthew 5:11.

Lesson: Jeremiah 20:1-6; 37:1 to 38:28; 43:1-7.

Your food doesn't do you any good if you're tired

At the end of a day's work, relieve nervous tension before eating. Wrigley's will refresh and tone you up—so that you're ready to enjoy your food.

Then, after meals, Wrigley's helps digestion, cleanses the teeth, removes all traces of eating or smoking—sweetens the breath.

The Desert Song

—BY—
VIRGINIA MORRIS
Copyright 1929 Warner Bros. Pictures, Inc.
"The Desert Song" is a Warner Bros. production of this novel. It is based upon the story by Otto Harbach, Laurence Schwab, Oscar Hammerstein, 2nd, and Frank Marshall.

CHAPTER I.

Greedy the copper coin of the sun was tossed by some invisible hand into the coffers of the desert. Now a purple raincloud suffused the burning sands till the deepening twilight gradually wrapped its cloak all around. A few hours before a pure silver moon had been poised in the cloudless daylight sky, but as night descended this assumed a golden red and seemed to retain, concentrated in its mellow circle, all the glow and color of the desert landscape that was now clothed in a nocturnal mantle.

Out of the range of the moon's brightness silver stars began to show their glinting lights. A soft cool breeze slowly blew up, shifting the sand drifts into new undulation that stretched to far horizons. The majestic silence was so intense as to be almost audible.

One would have sworn that not a human being dwelt within ten leagues of the spot. Then all at once out there in the infinity of desert space arose a faint stirring. For a moment nothing was seen, but as the stirring grew into a definite far-off sound, under the right light of the orange moon there appeared a tiny speck where sand and sky met on the distant horizon. Over the crest of the dunes another speck appeared, followed by countless others. But now the leader was distinguishable as a rider on a fleet-footed horse, followed by a ribbon of other desert cavalymen clad in turbans and flowing robes, their rifles held high in their right arms to proclaim their warring spirit.

The swish of galloping hoofs raising granules of sand in a dusty trail behind them was at first the only sound to break the stillness. But as the last rider came in view over the crest of the distant slopes the voices of a hundred men filled the night singing the rousing bars of their tribal song, the song of the Rifas, those desert outlaws who have scorned the domination of the alien French.

Far across the desert these riders swept until they reached the crags where they had their secret encampment. Up a short trail their horses climbed to an opening in the rocks that formed a narrow cave. Here they dismounted. Some vaulted to where a cauldron was stewing goat's meat for the evening meal.

In the fire's light Sid El Kar, Lieutenant to the Red Shadow—the leader of the Rifas, examined some

messages that the horsemen had brought from scattered members of the tribe. The subordinate who stood beside him ventured a worried comment:

"I hope the French don't find us. This new leader of theirs, Captain Paul Fontaine—"

Sid El Kar uttered a vile oriental oath and spat in the sand. "To the devil with him. For five years the frog-eaters have been chasing our head and all they have caught—is our dust!"

"But," put forward the other, "it is different this last week since Captain Fontaine has taken command. Three times they have nearly trapped us."

Sid El Kar's mouth framed a contemptuous sneer. He pointed to the tent that lay pitched closest to the fire.

"Our Red Shadow is a match for a million Captain Paul Fontaines! There were few faint hearts in the Rif band. They had confidence in their prowess as fighters and above all in the bravery of their mysterious leader, the Red Shadow. He had come to champion their cause against the tyranny of the French who believed that the desert people were best subdued by the imperious attitude of conqueror and vanquished. But even against the armed forces of the French, the Rifas had succeeded in preserving their independence. Now led by this fearless desert Robin Hood, they defied the rule of the foreigners and defended their desert."

Sid El Kar's words were full of brothers against the domination of those who failed to understand their customs or their emotions. Surely the Red Shadow was bent by fate to protect his children! None knew whence he came, but when the signal fires were lit and the Rifas assembled, the Red Shadow always appeared as if by magic. Then when the good work was accomplished he rode off, where no one could say.

Attracted by the savory scent of the cooking, other members of the band who had watered their horses and tethered them, now drew near the fire. To their companions who had remained in camp they recounted the adventures they had gathered on their latest expedition. The whole town, it seemed, was talking of this Captain Paul Fontaine who, with a regiment of devils from the Foreign Legion, had set out to discover the Rifas' hiding place. General Bireau, commander of the post, was offering him every assistance with additional horses and troops.

They had picked up another juicy bit of gossip, too. Captain Fontaine was in love, madly enamored of a beautiful and chic French girl, Margot Bonvalet, who had recently come out from Paris. Her father, so one said, was a lifelong friend of General Bireau's, and it was at his quarters that she was staying—and breaking the heart of every handsome officer in the regiment. But her preference, it was clear, was for Fontaine who had promised her, with a gesture of bravado, that he would bring her the Red Shadow as a prisoner.

The threat caused a wave of merriment among the band. The Rifas would never fall under the power of the French!

"To kill the Red Shadow, Fontaine must kill us all!" shouted one of them lustily.

"May evil spirits possess them, Fontaine and — Margot Bonvalet!" added another fiercely.

All at once their talking ceased. They drew themselves to military attention. For before them stood the Red Shadow himself!

CHAPTER II.

Every line of his fine straight figure proclaimed the fighter. He wore a loose, bright scarlet burnoose, the hood of which was held firmly around his forehead by a white band. He was shod in gleaming black military boots and his sword was sheathed in the scabbard that hung beneath the folds of his cloak. His

chin suggested that his face was as handsome as his physique but one could not be sure of this because his cheeks and eyes were concealed behind a scarlet mask. This, which he always wore, had helped to surround him with an aura of mystery for even his closest handman had never seen him without it.

With a wave of his hand, the Red Shadow signaled his followers to be at ease. They relaxed from their military attitude and segregated into small groups. Their leader approached Sid El Kar and Hassi, who was another of his trusted fighters in spite of his advancing years.

"I overheard this talk of Captain Fontaine," he said, "and I scorn his threats! But I do not like the references to this girl they call Margot. His listeners looked up in surprise. Then he continued, addressing himself to Hassi, 'My friend, I want your promise. The sign of the Heart and the Head—'

"It is gladly given," affirmed the oriental as he placed his right hand over his heart, then raised it solemnly to his forehead in the desert ritual that signifies a sacred pledge.

The Red Shadow lowered his voice to a whisper, "If anything should happen to me, no harm must ever come to Margot Bonvalet!"

The two Rifas regarded him with astonishment. "Master, I do not understand," said the perplexed Hassi.

"No," agreed the Red Shadow, "you do not understand me. That is because you are Mohammedans while I am French."

"But," interrupted Sid El Kar, "none of the band knows you're French, except us two!"

"That is why I am asking this promise of you," insisted their leader. "No harm must ever come to Margot Bonvalet."

"Now, listen, Master," argued Hassi, "after all she's only a woman."

"That is the oriental in you," retorted the Frenchman, "you cannot understand western love, but let me tell you this, I would not be your leader if it were not for this Margot."

Then for the first time he disclosed to them the motives that had led him, an outsider, to champion the cause of the Rifas and the French. A strange story it was that he told them! Eight years ago in Paris he had fallen in love with this girl. She had refused to take him seriously, had called him a silly boy—so he had enlisted in the French army to prove to her that he was a man. He set out from home with a contingent sailing for Morocco, under the command of General Fontaine, Captain Fontaine's own father.

This general had been notorious for his cruel treatment of the natives. Sometimes his own men used to refer to him secretly as the Butcher. One day he had commissioned the one now known as the Red Shadow to raid a certain village. The soldier had refused to exercise this unnecessary brutality and his superior had struck him full in the face, cursing him and calling him cowardly traitor. To escape the inevitable sentence that the court martial would pass for insubordination, he fled to the hills where the Rifas made their lair.

(To Be Continued.)

Every Day Circus Day

Capital of Southern Morocco Never Lacks Entertainment

Every day is circus day in Marrakesh, the capital of Southern Morocco, in which life goes on much as it did in the days of the Arabian Nights, according to a writer in the "Living Age." The hard-packed, reddish soil is an arena for all the feuds and entertainments of North Africa, for the city is still the guardian of the old caravan route from the desert's rim to the sea.

Acrobats, snake charmers, story tellers, musicians, and the rest, daily and nightly entertain travellers who are armed with wicked knives, and display every skin shade from the blondest of the Rifian to the ebony of the pure negro.

Alberta Sugar Beets

T. George Wood, manager of Canadian Sugar Factories, Limited, at Raymond, Alta., announces that drills are busy in every section of the company's producing territory and that soil conditions are very good. "We expect to drill in about 10,000 acres of beets which is substantially higher than last season," he said.

Some girls get husbands, and some never learn the art of telling men how wonderful they are.

North: "I like to be alone."

West: "Well, you could stay at home evenings!"

W. N. U. 3787

Identity Still Kept Secret

Kaiser's Best Woman Spy Now Inmate Of Insane Asylum

"The Madonna of Antwerp," Germany's cleverest spy during the World War, who lured hundreds of the ablest allied intelligence agents to their death by the mere fascination of her blonde hair and marvelous blue eyes, has been locked up in an insane asylum at Cologne. The commitment papers in her case state that her illness is considered incurable, but her identity, jealously guarded by the Germans during the war, is not revealed even at this time. She remains the same mysterious and elusive personage who was dreamed and hunted for four long years without success.

Her smile was as enigmatic and wistful as Glenda's in the Louvre, of a certain childlike innocence, but as deadly as Borgian poison. Once she had extorted the information she sought from her victims her features grew hard as steel and she knew no mercy.

Rumors during the war had it that she was of noble Belgian birth. This was due to the fact that she owned a large medieval chateau on the outskirts of Antwerp, which she inhabited from 1912 onward. When Antwerp and the surrounding country fell before the German advance of September, 1914, and hundreds of thousands of people fled across the Dutch border, "The Madonna" stayed behind and revealed herself as having been an agent of the German Intelligence.

She directed the location of treasure and valuables in the neighborhood of the Flemish capital, left behind and hidden by the refugees owners of chateaux and country places, and in that way started the career which made her dreaded from the territory of Belgium and French Flanders.

Rations Not Well Balanced

There is an abundance of Bibles and psalm salts on the world's loneliest island, according to the Rev. R. A. C. Pooley, who had just completed several years as padre of Tristan da Cunha. "We have 150 pounds of salts and five Bibles for each islander," he said. "Our greatest needs are food, clothing, watches, paint, barometers, and seeds."

Mother: "Have you given pleasure by doing a good deed today, dear?" Jim: "Yes, I gave Tommy Brown an awful licking."

Mother: "But that was not giving pleasure to another."

Jim: "Yes, you should have seen how pleased his little brother Bill was."

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—a pleasant, dose in water. It is a pleasant, efficient, and

harmless. It has remained the standard with physicians in the 60 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 60 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Government and Business

Even Smallest Job Sometimes Is Very Costly

A couch in the office of a United States district attorney in a Middle West city was damaged. He notified the custodian of the building, who was collector of internal revenue. He notified the Treasury. The Treasury notified the supervising architect in Washington, who ordered the custodian to advertise for bids. The advertising cost \$39.50. The bids were forwarded to Washington, an award made, the contract signed, and work was done. The cost of repairing the couch was \$3.94. An inspector was sent to inspect the job. He didn't like it and had a row with the contractor. The chief inspector had to come out. He approved the job. Nine months later the contractor received Uncle Sam's cheque for \$3.94.

Regina Building Program

One Thousand Homes To Be Constructed This Year At Cost Of Four Million Dollars

One thousand houses, worth close to \$4,000,000, will be built this year in Regina, according to the estimates of the local contractors. Already there are 262 dwellings shown on the books of the building office, compared with 57 at the same time last year, and since construction last year amounted to 632 houses, worth a total of \$2,500,220, it is regarded as fairly certain that the expectations of the builders will be fulfilled.

There's always a trick in it. They sell you a car or a phonograph on credit, and then demand cash for gas and dance records.

Little Helps For This Week

"Continue in prayer."—Colossians iv. 2.

Be not afraid to pray,—to pray is right. Pray if thou canst with hope; but ever pray. Though hope be weak, or sick with long delay, Pray in the darkness if there be no light.

Whatever is good to wish, ask that of Heaven. Though it be what thou canst not hope to see; Pray to be perfect, though material heaven Forbid the spirit so on earth to be; But if for any wish thou dar'st not pray, Then pray to God to ease that wish have—startle Coleridge.

Prayer is ever profitable; at night it is our covering, in the daytime it is our armor. Prayer is the key to unlock the day, and the bolt to shut in the night. Prayer sanctifies all our actions.

Fires In B.C.

British Columbia faces the most disastrous forest fire season of recent years, according to reports from the forest branch of the department of lands which show that 133 fires have already been reported from different parts of the province with the fire hazard in the northern part of the province increasing with the warm weather.

Why go to Peru?

When crude oil is so plentifully available here in North America, why does Imperial Oil Limited go 4000 miles to Peru for the crude from which Marvelube is made?

It is because Peruvian crude has lubrication properties which make it particularly desirable as a base for a superior motor oil.

That is why Marvelube is giving aircraft operators longer periods between engine overhauls and a greater margin of safety.

Marvelube meets the needs of the modern high-speed motor, in the air or on the road, because its carbon-free and heat-resisting superlatencies are created by Nature herself.

Let Marvelube give you the benefits of better lubrication. There is a grade of Marvelube refined to meet exactly the specifications of your car, truck or tractor. See the Marvelube Chart at Imperial Oil dealers and service stations.

Marvelube
From far Peru comes a better crude to make a better motor oil/

To Check "FLU," Grippe

Fights the Germs in the Throat Before They Invade Other Parts of the Body.

EFFECTIVE PREVENTIVE MEASURES EXPLAINED

Simple precautions taken now will enable you to fight dreaded "Flu" which is sweeping rapidly through the whole country. The germs of influenza gain access to the body through the mouth and throat. To keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nerville. Half a teaspoonful of Nerville in water makes a most efficient gargle. The germ-killing properties of Nerville quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure, to rub the neck and chest with Nerville. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding wastes. This combination treatment of Nerville and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

Mr. and Mrs. J. A. Sackett motored
to Calgary on Saturday.

Born—To Mr. and Mrs. Leslie
High, formerly of Crossfield, a daughter
on May 28.

Miss Hazel Howard and Mr. C.
Reid spent Sunday at the home of
Miss Howard's parents.

Miss Dorothy Crocker is at present
spending her holidays visiting her
parents in Crossfield.

We notice Mr. F. Collett's name
on the list of associate directors for
the 1929 Calgary Exhibition.

Mr. and Mrs. L. V. Bliss and family
were in town Wednesday night for
the ball game.

Mr. and Mrs. Melville Reid, of Cal-
gary, visited at the home of Mrs. S.
Willis on Sunday.

Mr. and Mrs. E. Devins were guests
at the home of Mr. and Mrs. C. Wight
in Carstairs on Sunday.

Mrs. Taylor and Mr. and Mrs. Moxin,
of High River, visited Mrs.
Cruikshank, Mrs. Taylor's daughter,
on Monday, last.

The local ball team was well sup-
ported by an encouraging crowd of
fans from here at the game in Red
Deer on Monday.

Mr. and Mrs. R. W. McFarlane and
family, of Bassano, were visitors in
town, and guests of Mr. and Mrs. M.
Thomas over the week-end.

Mr. and Mrs. H. Robinson and
family with Miss Grace Sackett drove
to Ghost River on Sunday to view the
huge dam under construction there.

On Monday next, June 3rd, the
post-office will be closed, except be-
tween the hours of 10 and 11 a.m.
The door will be open for the con-
venience of box renters as usual.

Mrs. Ontkes who is sufficiently
recovered from her recent severe ill-
ness to travel short distances, visited
Crossfield two weeks ago and renewed
old acquaintances.

Mr. and Mrs. Christiansen and
family attended the sports in Olds on
May 24th, and seemingly were ex-
ceedingly interested in the fast brand of
ball games exhibited.

Among those from out of town who
returned home for the holiday and the
following week-end were: Miss Lillian
Johnson, Mr. Howard Halliday and
Mr. Percy Willis.

Miss Shantz, who taught in the
public school here until Christmas
time, is spending a few days in
town, renewing acquaintances, the
guest of Mr. and Mrs. Harry Fitz-
patrick.

May 24th proved a great day for
the annual sports held at Olds, in
spite of occasional dust storms and
was well attended from outside points.
Several visitors from Crossfield being
noticed among the crowd.

Messrs. Tredaway and Springsteen
will hold a field demonstration at the
McCaskill farm, east of the C.P.R.
tracks on Tuesday, June 4th, at 2
o'clock.

The ladies of the Anglican Church
wish to convey their thanks to all
those who in any way contributed
towards making their tea such a suc-
cess on Saturday, May 18. The total
proceeds amounted to \$36.00.

Along with the rest of the added
improvements in Victoria Park in
Calgary, Patrons will be pleased with
the new paved walks from Second
Street East and 17th Avenue to the
Industrial Building and through the
midway to the east end of the grand-
stand.

We are pleased to note that the
Town Council is having several im-
provements made in the village roads.
The road to the ball diamond is being
re-made and a new road from the road
straight west of town joining the one
to the fair grounds is under construction.

One of the crossings on Main Street
is being filled with cement and it is
likely that the sidewalk along the
central block will be all re-paved. The
project is filled with huge holes
which were caused by fire several
years ago. The improvements will be
greatly appreciated by the towns-
people and will add to the better ap-
pearance of the village.

ORDINATION SERVICE HELD
A special ordination service was
held in Pro-Cathedral on Sunday
morning, May 26, when Rev. J.
Adams-Cooper of Crossfield and Rev.
Victor Smith of Rocky Mountain
House, formerly deacons, were or-
dained priests by the Rt. Rev. R. L.
Shesman, Bishop of the Diocese. The
service was well attended and
several members of the local Church
of the Ascension present.

Hardly a week passes but some
good reason has a suggestion to make
for the betterment of the town. No
sooner is the suggestion made than
some other good citizen objects, prin-
cipally because he does not like the
first citizen. It is human nature, and
we are just as human here as elsewhere.
But there is a better way—a
way that is quite as human and your
antipathy toward the man and
think only of his suggestion—of what
it will do for the town—of what it
will mean to you as a citizen of the
town. Very few good citizens think
exactly alike. Many are diametrically
opposite in their convictions, in
their tastes, in their likes and dis-
likes. But there is a common ground
upon which we may all meet and
bury our animosities. That is the
common good of all—the betterment
of our community—the fostering of
the welfare of our collective citizenry
for the benefit of each individual
citizen, and for the benefit of our-
selves. It is the starting point of
prosperity—the grave of adversity.
It is the point we should seek and
find.

MORTGAGE SALE OF VALUABLE (FARM) PROPERTY

Under and by virtue of the Powers
of Sale provided by the Land Titles
Act, under a certain mortgage which
will be referred to at the time of sale.

There will be offered for sale by
